2 PSF Reconstruction

20 February 2024

- Create custom dynamic dataloader for PL output flux and PSF complex field for PSF reconstruction

26 February 2024

- Create a dataloader to dynamically load flux and psf
 - Normalize electric fields, real and imaginary parts independently
 - Normalize PL output fluxes
 - Train a fully connected nn with horrible results, train mse keeps stable at 1, will have to look at the data
-

27 February 2024

- Create plotting functions to show amplitude, phase and intensity from an electric field
 - Normalize electric field, this time dividing the complex number matrix by a constant (50.000 in this case)
 - Redo output flux calculation with the normalized electric fields through the transfer matrix of the 19 fibre PL
-
